

Sorting Pumpkins

Assembly Instructions:

- Print all pages on card stock paper.
- Glue page 2 on the front of a file folder. Glue pages 3-4 to the inside of the same folder with one page on each side.
- Laminate the folder and pages 5-6.
- Add **HARD Velcro** to the individual pieces from pages 5-6, these will be used to interact with the activity.
- Add 5 pieces of **SOFT Velcro** to each 'page' in the folder.
- Cut out the pumpkins and add them to the correct side to 'store' them until activity is to be used.

**Idea* you can print pages 5-6 only and add fall, Halloween stickers, or pictures, etc. to the back of each one. Laminate, cut them out and you have a memory/matching game. For older students cut out sales ads from the newspaper, glue them to the back of the pumpkins for a memory/matching game. The winner maybe determined by adding the 'price' of the items to see who has more, less, etc.*

Let's Sort Pumpkins

These pumpkins are large.

These pumpkins are small.
